Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by the US Patent to Baur (5881026).

The reference discloses a non-magnetic balance spring for an oscillating balance in a timepiece, the balance spring being formed from a compo site material Nb-Zr (see claim 1), the balance spring having a coefficient of thermal expansion α_2 (α_s in claim 1, line 12), and a thermoelastic coefficient $\delta E/E$ (line 9 of claim 1) arranged to cooperate with the coefficient of thermal expansion α_2 (α_b in claim 1, line 14) of the balance to compensate for thermal variation of the system (col. 1, lines 39-44).

Claims 1-22 are allowed.
